New Accessory Line up for Warn winches and Warn ploughs

With the introduction of the Vantage and ProVantage winches the line up of accessories were updated as well.

These new accessories will make winching more easy and gives you a better handling while using the plough as well

Propivot plough

Rotates plough blade up to 28 degrees at the push of a button-even under load .

P/N YME887000000

- Equipped with a powerful motor
- designed using a durable split-ring gear train, ProPivot will make quick work of all ploughing activities.
- Improved sealing along with a shock absorbing dampener system makes the ProPivot a must-have when you need superior response and versatile plough performance.

Note;

Propivot can not be lifted with Provantage plough lift
(YMD846000000) Propivot system can only be lifted with winch.

Supersession of the "old" power pivot YMD793600000

Neoprene Winch Cover

Protects the winch from water and freezing

P/N YME719800000

- Made of durable, tight-fitting neoprene that resists water and cracking

Fit on;

Vantage 3000

Pro-vantage 2500 and 3500

Wireless control kit

Control your winch from anywhere within a 15 metre range of your vehicle.

P/N YME902880000

- Let's you operate your winch from anywhere within a 15 metre radius.
- Two-colour LED provides instant feedback during the winching process.
- System shuts off automatically after three minutes (or it can be turned off manually) to conserve battery life.

The WARN® Wireless Control System will work with WARN 1.5ci, 2.5ci, 3.0ci, RT/XT, Vantage and ProVantage winches

Supersession of the "old" wireless control kit YMD74500000

Plough HD mounting

Upgrade mounting points which increase the durability and performance of your system

P/N YME852430000

- Wear-form steel construction.
- Increase the durability of your mounting points.
- For front-mount plough only.

Plough Slack Control

Increase the durability and performance of your system

P/N YME857420000

- Extend the life of your plough system and winch rope.
- Eliminates winch overrun when lowering the plough (also corrects cable tangles).

Plough Limit Control

Increase the durability and performance of your system

P/N YME859500000

- Protects your vehicle from impact and stops “over raised” conditions.
- Allows you to fine tune system for a variety of stop positions.
- For front-mount plough only.

Pro Vantage Plough Pulley

Provides better control of plough blade by doubling the lifting advantage, slowing blade movement and repositioning the lift point.

P/N YME845260000

- Contributes to longer rope life by reducing load and bend over angle.

Note:

Plough Pulley Kit is not compatible with WARN Power-Pivot or Plough Lift

Winching Accessory Kit

All the accessories you need, in one handy bag . Glove up to pull out. Double your line capacity with a snatch block and save a tree for the next guy with the Trunk protector.

P/N YME889150000

Kit includes:

- 1/2” (12.7mm) shackle,
- 9,000 lbs.(4082 kg) maximum capacity snatch block,
- 2 1”x 8’ (25.4mm x2.4m) tree trunk protectors,
- 1 pair WARN® winching gloves.

It all comes in a heavyweight denier carry bag.

Supersession of the “old” Winching accessory kit YMD633500000

**Shackle**

- 1/2" shackle for rigging attachments.

P/N YME889980000

- Rated for use with winches up to 4,500lbs. (2041 kg)

**Snatch Block**

Assists in double-lined and angled pulls.

P/N YME888980000

- Rated to 9,000 lbs. (4082 kg) capacity and under.

**Synthetic Rope Extension Cord**

Includes lightweight 1/4" diameter rope, which attaches to the winch cable for an additional 15 metre of distance

P/N YME690690000

- 4,000lb. single line capacity.

Hawse Fairlead V2000

This Fairlead must be used when synthetic rope is mounted on the vantage 2000 winch

P/N YME895670000

- It reduces the slip and friction with synthetic rope

Note:

fits only on vantage 2000 and can only be used with synthetic rope.

Synthetic Rope Vantage 2000

This rope can replace the steel wire on the vantage 2000 winch

P/N YME895630000

Note:

fits only on vantage 2000 and When replacing a wire rope with synthetic, it is necessary to replace the fairlead to avoid damage and wear to the new synthetic rope from the rough surface of the old fairlead.

Synthetic Rope kit

Includes synthetic rope, rock guard sleeve and roller fairlead.

P/N YMD721280000

Note:

When replacing a wire rope with synthetic, it is necessary to replace the fairlead to avoid damage and wear to the new synthetic rope from the rough surface of the old fairlead.

Fit on

- Vantage 3000 and Pro vantage 2500 / 3500

ProVantage plough lift

Effortlessly lifts your ATV plough without needing to use your winch.

P/N YMD84600000

- Optimized lift speed for grading control. Screw-drive system has plenty of lifting power with low amp draw.
- Includes all hardware, wiring, and all-weather handlebar-mounted switch.
- Compact design; easy to install-will fit all WARN ATV plough systems new or old.

NOTE

- Will not work with Power-Pivot installed on snow plough*

Plough Lift rope (2,4 meter)

Temporarily replace your winch rope for plough season, saves wear and tear on wire rope.

P/N YMD68560000

- durable super-strong synthetic rope.
- Stands up to repeated, sharp angle pulls used to lift heavy plough blade.

- Fit on
- Vantage 3000 and Pro vantage 2500 / 3500

Plough Markers

These 61 cm high antennas are constructed of flexible material to withstand impact.

P/N YMD676790000

- Markers have red rubber tips for increased visibility; these clearly mark the edges of your plough blade even in deep snow.
- Sold in pairs.

Recommendations for plough usage

1. Provantage plough lift (YMD846000000) *This will enhance lifetime of the winch.*
2. Winch with Plough Lift rope (2,4 meter) (YMD685600000). *New fairlead has to be used when you change from steel wire to synthetic rope to prevent the synthetic rope from being damaged.*
3. Winch with synthetic rope

Not recommended for plough usage

- Winch with steel wire
- Multi-Mount winch for use as a plough blade lift

Steel vs. synthetic winch rope.

WARN Vantage and ProVantage winches are available with either steel rope or synthetic rope. But which one is right for you? Let's look at some of the features and benefits of both.

Steel rope is extremely durable, abrasion resistant, and is good for utility applications where the line may contact objects like stumps, rocks, and other things that rub against the rope. Of course it's still a good choice for vehicle recovery, and has been used for decades by enthusiasts and workers alike.

However, steel rope is heavier and less flexible than synthetic line. Steel rope is also less expensive than synthetic rope.

Synthetic rope is strong, lightweight, easy to handle, and it'll even float on water making it great for vehicle recovery.

Synthetic rope is more prone to damage by abrasion and requires the use of the included abrasion sleeve when the rope comes into contact with an object. Additionally, synthetic rope should be inspected regularly for ultraviolet (UV) wear and is more expensive than steel rope.

However, it's a great choice for those who are looking to keep weight down, push the limits with their vehicle, and use the winch frequently
